Profile Summary

Computer Engineering student with hands-on experience in full-stack web development using HTML, CSS, JavaScript, Python, Flask, SQL, and Docker. Skilled in building responsive web applications, implementing backend logic, and designing relational databases. Developed practical projects including an Internship Tracker application with CRUD functionality and containerized deployment. Strong understanding of object-oriented programming, database management, and web application development. Seeking software development or full-stack development internship opportunities to apply and enhance technical skills in real-world projects.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Savitribai Phule Pune University (SPPU), Pune

Expected Graduation: 2028

CGPA: 8.0/10

Relevant Coursework: Data Structures, Object-Oriented Programming, Database Management Systems, Web Development, Programming in Python

Technical Skills

Programming Languages: Python, C++, SQL, JavaScript

Web Development: HTML, CSS, Flask Web Framework

Database Technologies: SQL, Relational Database Design

Tools & Platforms: Docker, Tomcat Server, Git

Core Concepts: Object-Oriented Programming (OOP), CRUD Operations, Backend Development

Projects

Internship Tracker | Full-Stack Web Application

- Developed a full-stack web application to track and manage internship applications through a centralized dashboard.
- Implemented complete CRUD (Create, Read, Update, Delete) operations using Python Flask for efficient data management.
- Designed and integrated a relational SQL database to store and retrieve internship application details effectively.
- Added application status tracking features including Applied, Interview, Rejected, and Offer stages to manage 20+ applications efficiently.
- Built a responsive and user-friendly frontend using HTML, CSS, and JavaScript.
- Containerized the application using Docker, reducing setup and deployment time by approximately 50%.
- Applied backend development concepts and database management practices to improve scalability and maintainability.

Strengths

- Strong problem-solving and analytical thinking skills
- Quick learner with the ability to adapt to new technologies and frameworks
- Good understanding of software development fundamentals and backend systems
- Effective teamwork and communication abilities through academic and technical projects

Career Objective

Aspiring Software Developer and Full-Stack Developer seeking internship opportunities to gain industry experience, contribute to real-world projects, and strengthen skills in backend development, web technologies, and software engineering.
